Utilities	Jira, Salesforce, VersionOne

PROJECTS PROFILE:**Project #1: ComplianceWire - Migration, UL.**

Duration: Feb 2019 to till date

Synopsis:

ComplianceWire is a fully validated learning management system for the client UL and evaluates learning management to knowledge management by including a number of optional tools that measure knowledge and proficiency.

ComplianceWire serves as the single learning repository for an FDA-regulated enterprise, so that audit records can be generated with little effort. You can store both employee and non-employee records in a single system, separated by security nodes that limit access.

ComplianceWire allows user to assign, evaluate, approve, and report training items through structured hierarchy and curriculum.

My Role:

- Actively participating in business requirements walk through with Business Team. And also working with off-shore team to understand the requirements.
- Involved in the data migration from Source company to Destination company by migrating Users, UserGroups, Training Items, Curriculums, Assignments and scores.
- Involved in developing the stored procedures to process these data and populate them in the appropriate destination tables.
- Actively involved in Design and Code reviews
- Assigning the work to the team, tracking status and providing status updates to on-site counter parts.
- Guiding the team to understand the system functionality and helping to complete the tasks on-time as per the schedule.
- Single Point Of Contact (SPOC) to testing team to debug the issues/cases raised in Jira Tool.

Line of Business:

LMS

Environment:

ASP.Net, C#, Sql Server 2017 and Jira

Project #2: ComplianceWire, UL.

Duration: Feb 2013 to Jan 2019

Synopsis:

ComplianceWire is a fully validated learning management system for the client UL and evaluates learning management to knowledge management by including a number of optional tools that measure knowledge and proficiency.

ComplianceWire serves as the single learning repository for an FDA-regulated enterprise, so that audit records can be generated with little effort. You can store both employee and non-employee records in a single system, separated by security nodes that limit access.

My Role:

- Actively participating in business requirements walk through with Business Team. And also working with off-shore team to understand the requirements.
- Discussing requirements with BA's and providing estimations accordingly for any new requirements.
- Actively communicating with on-site team for day-to-day status updates.
- Involved in loading the partner flat files into the OLTP database. Also, developed stored procedures to process these data and populate them in the appropriate destination tables.
- Working on Stored Procedure, Performance Tuning, SSIS package and deployment based upon the issues and Work Orders.
- Actively involved in Design and Code reviews of Work Orders.
- Design/develop/review Users and Training Items feeds by using SQL Server Integration Services (SSIS).
- Guiding the team to understand the system functionality and helping to complete the tasks/stories on-time as per the sprint cycle.

Line of Business:

LMS

Environment:

ASP.Net, C#, Sql Server 2017, SSIS, Jira and Salesforce
